EXPERIENCE

Founding engineer · Curnance

· → present

Set up the engineering organisation and shipped the admin, wallet, and KYC subsystems.

- Built the Go service monorepo
- Shipped the Svelte admin and mobile wallet
- Stood up the KYC pipeline

Data Scientist · Etihuku

2021-05 → present

Data science and analytics at Etihuku, a data analytics and solutions consultancy. LLM document automation on Azure ML and SQL/Python customer analytics.

- Built an end-to-end document-generation system with large language models on Azure ML Studio, cutting manual creation time by 85% while meeting compliance requirements across three regions
- Analysed large customer datasets in SQL and Python, delivering operational dashboards and optimising transaction workflows

EDUCATION

PhD · University College Cork

In progress

Neural engineering and machine learning

Doctoral research on segmenting EEG into microstate sequences using variational autoencoders, supervised by Luca Longo at University College Cork.

MSc · Technological University Dublin

Machine learning, deep learning, data mining, visualisation, statistics

Taught master's in computer science with a machine-learning concentration; coursework in deep learning, data mining, statistical modelling, and visualisation. Completed 2025 with a 4.0/4.0 GPA (80/100).

BSc · University of Eswatini

Information technology

Bachelor of Science in Information Technology, awarded with Second Class Honours, Upper Division (2.1), GPA 4.51.

TECHNICAL SKILLS

DATA SCIENCE & ML	Statistical modelling · Optimisation · Neural networks · Transformers · LLMs
PROGRAMMING	Python · SQL · JavaScript · Go · R
TOOLS & FRAMEWORKS	PyTorch · TensorFlow · Pandas · scikit-learn · Spark · Hadoop
CLOUD & DATABASES	AWS · Azure · MongoDB · PostgreSQL · MySQL · Redis
VISUALISATION	Matplotlib · Seaborn · Tableau · Power BI

RECOGNITION

Google NLP Hack Series: Swahili Sentiment Analysis 2023

Google NLP Hack Series · 4th of 29

UmojaHack Africa 2023: Cryptojacking Detection 2023

UmojaHack Africa · 35th of 328 (top 11%)

Deep Learning IndabaX: Churn Prediction Challenge 2022

Deep Learning IndabaX · 3rd of 21

Winner, UNESCO India-Africa Hackathon 2022 (AGRI12) 2022

UNESCO · Ministry of Education Innovation Cell (India) · Gold medal + ₹3 lakh team prize

Tech4MentalHealth Challenge 2020

Basic Needs Basic Rights Kenya · 69th of 499 (top 14%)

SELECTED PROJECTS

Cleva

Real-time AI proposal generation, built for Gijima. · Engineer

TypeScript · Python · LLM

Curnance

Multi-asset fintech platform spanning admin, wallet, KYC, and a Go-based service monorepo. · Founding engineer

TypeScript · Svelte · Go · PostgreSQL · Kubernetes

Etihuku document automation

End-to-end LLM document-generation system that cut manual creation time by 85% across three compliance regions. · Data Scientist

Azure ML Studio · LLMs · Python · SQL

AI-assisted Farmer Call Center

Automated voice-response system letting farmers report issues via phone, SMS, or web and receive AI-routed answers. · Team engineer, Eswatini representative

Python · Voice AI · Twilio

EEG microstate analysis with variational autoencoders

Source segmentation of EEG signals via variational autoencoders, including a GMM-VAE for soft clustering. · PhD researcher

Python · PyTorch · MNE · NumPy · scikit-learn
